

Other Business for Friday (time permitting).

Alex Tarr advised that he has OV photos of the whole of the Warby Range, flown for the 2009 Oceania Champs at Northern Spurs.

As Chris Wilmott is closing his photogrammetry business and there is no known LIDAR for this area, Alex suggest that we get the base maps produced by Chris Wilmott now for future use.

This would require expenditure of around \$2k - \$4k of OV's funds as an investment for future maps for major events. (Perhaps 2019 Easter?)

I would like to seek Council approval of this.

Clubs are also encouraged to take advantage of Chris Wilmott's services before the opportunity is lost. This is why we should be planning major events several years ahead of time.
