

## ORIENTEERING VICTORIA

Orienteering in Victoria is a sport with great potential. We have seen the opportunities turn into growth in our own country of Denmark, where the participation numbers have grown through the development of local events, new local maps, junior coaching and development program's.

We are here to offer you the club representatives and Orienteering Victoria an opportunity to access our expertise and energy over the next few months (until Christmas).

### What we can do:

#### **1. Affordable Local Map Making**

We can make park or urban maps, small forest maps, sprint maps, street maps and school maps. We are very experienced and offer the complete package, from identifying map locations to making the map and setting course for your next event.

We can offer you new maps for the 2015 Melbourne Bush O or Sprint into Spring series.

You can chose between a per hour rate or all inclusive fixed price.

#### **2. Club or Group coaching**

We offer customized coaching clinics and sessions aimed at enhancing skills for experienced orienteers through to introductory novice instructing.

From club nights to sports groups and schools programs.

#### **3. Bush Event Expert Course Setting**

We understand some clubs may like to access our low cost expert assistance for the 2015 calendar. We offer everything from course planning, control site tapping, venue design, control descriptions, Eventor details and event promotional materials. Actually we can offer the whole package or as much or little as you like to make it easier on your club when it comes to next year's big events.

#### **4. Schools Assistance**

The Victorian Schools orienteering program is very active. If OV can see an opportunity to enhance the appeal of orienteering by using our skills, we would able to participate at any level.

#### **5. Increasing Participation Development Programs**

We can offer a service to Orienteering Victoria to increase participation rates and accessibility coaching to the wider community. Along the lines of the ACT and Tasmanian initiatives, where International coaches have been employed for a short period, we are equally able to fulfill all these requirements.

### Who we are:

We are three young Danish orienteers on a working holiday in Melbourne  
Eskil Schoning. Danish map maker and Elite orienteer

Jacob Edsen: Danish Junior Sprint champion, National Team member. Active in course setting and coaching

Thor Norskov: Current Danish Junior Champion and Australian Senior Champion 2014. Active in coaching, course setting and map making

### How much we will cost:

We have current Australian work visas. This for us is a working holiday so our rate is a very reasonable; \$19 per hour and we can assure you our quality, work output and energy levels are very high.

When are we available:

We would love to start immediately. We actually need to start very soon! As you may already know, we are here for only a few months in the lead up to the World Cup in Tasmania and time is ticking away quickly.

Thanks for this opportunity

We understand that orienteering is a minor sport here in Australia. In Denmark the drive behind our recent growth we believe is due to the enthusiasm and initiatives of our leaders. Participation numbers have grown with our high quality local events, greater expertise in and around events, quality coaching and development programs that enhance the orienteering experience.

Ultimately we are (personally) seeing this success flow onto the highest elite level and then back again to the sport through greater exposure.

We really do hope that you as clubs or Orienteering Victoria can see a way to employ us for this short period and in return we can guarantee you our enthusiasm, commitment and expertise to you.

Thanks again  
Thor Noerskov
