

## Orienteering Victoria Standard Class and Course Names for Events in Series

These are the standard names to be used for all events in the series listed below.

*These names must be used by event organisers when setting up Eventor/OE and course setters using Ocad/Condes/Purple Pen software. Please ensure you type (or copy) them exactly as shown here.*

When standard names are used, events can be quickly set up by copying from a previous event in the same series. Standard class names allow a Series to be created in Eventor, to produce a set of Series results when required. Course names are printed on maps and control descriptions. The aim is to provide consistency so competitors (particularly newcomers) always know the difficulty of their chosen course.

Class Long Use in OE and Eventor. OE must match Eventor EXACTLY in order to upload results

Class Short Use in OE and Eventor - abbreviated class name

Course Use in all course setting software, and OE when associating courses and classes
